a world of possibilities

a world of colour

a sliding door
with excellent thermal and acoustic insulation

Sustainable

Deceuninck PVC-U windows and doors are environmentally friendly, our material is completely recyclable, it will not warp or rot and will never have to be painted. Choosing a sliding Zendow Monorail is opting for years of trouble-free comfort.

Insulating

The Zendow Monorail is compatible with all common types of installation. Furthermore, it protects from the elements, with a multi-chamber profile, it offers excellent thermal and acoustic insulation. All these features ensure that Deceuninck Monorail sliding doors help to reduce heating bills and CO₂ emissions whilst meeting the current requirements of Building Regulations, Approved Document L.

Beautiful

The subtle contours and colours of the Zendow Monorail is like no other. If desired, the sliding door can be fitted with an aluminium threshold to protect the stunning looks of your monorail for years to come.

Safety and a sense of calm

You can make your Zendow Monorail sliding door secure against burglary with six position multipoint locking. To add a touch of individuality to your sliding door, you can choose a coloured handle to suit your taste.

intelligent design produces better performance

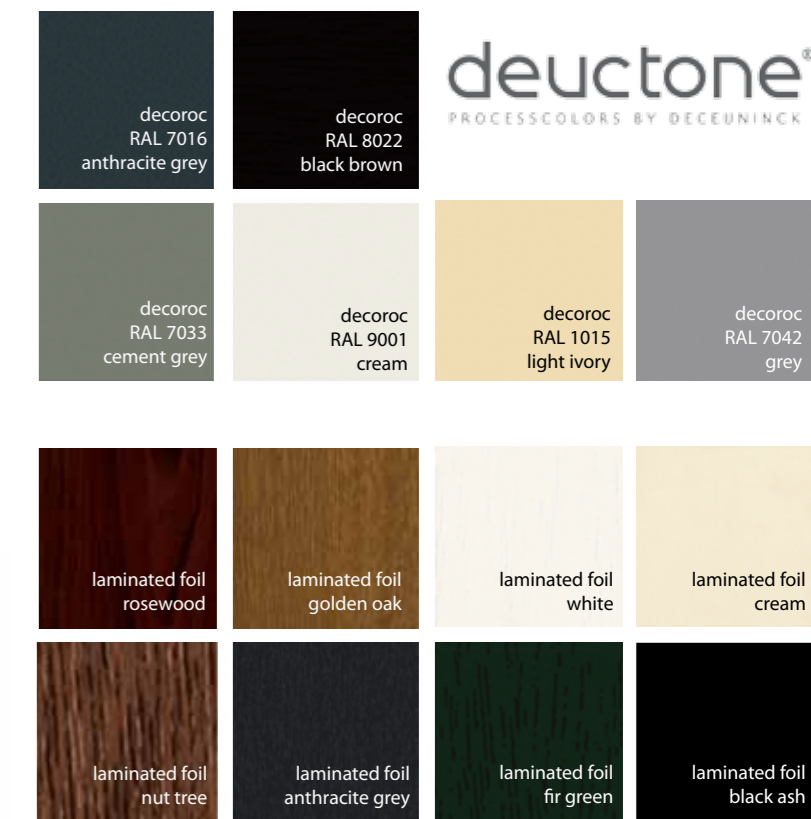

The Zendow Monorail blends seamlessly with any structure and demonstrates the kind of intelligent thinking that make our products market leaders.

Features of your Zendow Monorail sliding door include:

- Contemporary curved shapes and profile design
- Glazing from 4 to 42mm. Allowing special acoustic and triple glazing
- Tandem rollers with special bearings that allow optimum movement of the opening frame
- PVC-U profiles fully reinforced with galvanised steel for additional strength
- Integrated brush seals for optimum weather performance whilst allowing softer opening and closing
- Clippable trim profiles for a beautiful finish
